A comprehensive & objective rating of the Elected Representatives’ performance

MUMBAI REPORT CARD
MLA RATINGS 2013
Founded in 1998, the PRAJA Foundation is a non-partisan voluntary organisation which empowers the citizen to participate in governance by providing knowledge and enlisting people’s participation. PRAJA aims to provide ways in which the citizen can get politically active and involved beyond the ballot box, thus promoting transparency and accountability.

Concerned about the lack of awareness and apathy of the local government among citizens, and hence the disinterest in its functioning, PRAJA seeks change. PRAJA strives to create awareness about the elected representatives and their constituencies. It aims to encourage the citizen to raise his/her voice and influence the policy and working of the elected representative. This will eventually lead to efforts being directed by the elected representatives towards the specified causes of public interest.

The PRAJA Foundation also strives to revive the waning spirit of Mumbai City, and increase the interaction between the citizens and the government. To facilitate this, PRAJA has created www.praja.org, a website where the citizen can not only discuss the issues that their constituencies face, but can also get in touch with their elected representatives directly. The website has been equipped with information such as: the issues faced by the ward, the elected representatives, the responses received and a discussion board, thus allowing an informed interaction between the citizens of the area.

PRAJA’s goals are: empowering the citizens, elected representatives & government with facts and creating instruments of change to improve the quality of life of the citizens of India. PRAJA is committed to creating a transparent, accountable and efficient society through people’s participation.

It is a great privilege for us at Praja Foundation to be releasing our third consecutive Report Card of MLAs (Members of Legislative Assembly) rankings. We have done our best to make the criteria for ratings of MLAs transparent and relevant. The rankings are based on the role of the MLAs as defined in the constitution and perception of MLAs performance by their constituents.

The Report Card covers the working and performance of the 32 MLAs of Mumbai (excluding four who are ministers) during Winter 2011, Budget 2012 and Monsoon 2012 assembly sessions. It also covers the MLA Local Area Development funds spent by the MLAs for the period between November 2009 and March 2013.

Praja attaches great importance to probity in Public life. We are of the firm belief that criminalisation and corruption in public life is destroying Democracy in India. Our ranking gives a lot of importance to this issue.

MLAs are given negative markings on FIRs (First Information Reports) registered against the MLAs as declared in their affidavits. We further assign negative markings for those against whom new FIRs and Chargesheets have been filed during their tenure.

The recent Supreme Court ruling that an elected representative convicted of a crime cannot continue in office, even if they appeal to a higher court of law lends further credibility to our report.

This is perhaps the reason why the topper from 2011 and number two in ranking last year, Mr. Mangesh Sangle has dropped down to 20th in 2013. During the year in review the police filed a charge sheet against him. In the same fashion, Mr.Ashok BhauJadhav who was ranked 20 last year improved his ranking to five in 2013, as all criminal charges against him were dropped during their tenure.

Last year’s top ranking MLA Mr. Yogesh Sagar of BJP has retained his number One ranking. Mr. Amin Patel of INC improved his ranking to number two this year from number three last year, while Mr. Madhukar Chavan, again from INC nudged himself to rank three from four last year.

I cannot but help reiterate the purpose of such performance evaluating report cards for our elected representatives: Integrity and probity in public life are the standards that society expects those elected or appointed to public office to observe and maintain in the conduct of the public affairs to which they have been entrusted.
Integrity and probity in public life demand that those elected or appointed to public office are themselves imbued with a sense of responsibility to the society that puts them there; that the decisions they take should always be solely in terms of the public interest; that they act with honesty and integrity by not allowing their private interests to conflict with their public responsibilities; and that the behaviour must always be able to stand up to the closest public scrutiny. Similarly, civil society and institutions have a crucial role to play by calling to account those who will flout the rules and by refusing to tolerate any but the highest standard of behaviour in those who they elect or appoint to serve the public interest.

Just over 12 months are left for the next assembly elections in Maharashtra, scheduled to be held in October 2014. I sincerely hope this performance evaluation of the MLAs goads them into doing some exceptional work for their constituents during the last year of their term. The next 12 odd months will be like their final exam when the electorate will decide on the result – to re-elect them or to find a new candidate!

NITAI MEHTA, Managing Trustee

Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it’s the only thing that ever has.

– Margaret Mead

The change comes when people stand up and demand for it, and then strive to get it. Today we are at that juncture of history where time demands that we stand up and demand that change and go and get it.

Individuals involved in developing this report card strongly believe that they cannot just wait and remain mute spectators when time is demanding action from them. All of them have come together to develop this report card with a over-arching belief in the Constitution of India and the opportunity it creates for improved and efficient governance – the mean towards achieving the high ideals of the constitution – Justice, Liberty, Equality and Fraternity.

This book is a compilation of sincere, concerned efforts of the Core Praja Team. We would like to particularly appreciate the guidance of: Dr. C R Sridhar, KMS (Titoo) Ahluwalia and Dr. Suma Chitnis. And also to Praja’s Advisors for their active support.

It is important here to acknowledge Hansa Research for conducting the opinion poll.

It is also very important to acknowledge the support of Vakils for doing a splendid publishing work.

Praja has obtained much of the data used in compiling this report card through Right to Information Act, 2005; without which sourcing information on the MLAs would have been very difficult. Hence it is very important to acknowledge the RTI Act and everyone involved, especially from the civil society, in bringing such a strong legislation. Also to those government officials who believe in the RTI Act and strive for its effective implementation.

Very importantly, Praja Foundation appreciates the support given by:

Narotam Sekhsaria Foundation
FORD FOUNDATION
MADHU MEHTA FOUNDATION

ACKNOWLEDGEMENTS
The air in India is thick with criticism of politicians. The question that arises is: how can the performance of our elected representatives be assessed objectively? Surely the right way cannot be by asking them for their opinion of themselves. Nor is it adequate to get a few political pundits (who may have their own angles) to evaluate them.

The only way such an assessment can be done in a manner that is, and is seen to be, unbiased and credible, is through a systematic and transparent study undertaken independently by respected professionals. That is precisely what The Praja Report Card seeks to accomplish.

The ratings of the MLA’s are based on:

(a) Data accessed through RTI on attendance of Assembly sessions, number and type of questions raised, use of discretionary funds, etc.

(b) Personal interviews with 22,053 citizens of Mumbai conducted by a reputed survey research organisation, to investigate the views of citizens on their elected representatives.

We believe the Report Card is an important step forward in promoting accountability and transparency in the political governance of the country.

K.M.S. (TITOO) AHLUWALIA, Formerly Chairman & CEO of A.C. Nielsen ORG-MARG
He was appointed as Vice-president of North east district youth Congress committee between 1988-93 then Joint Secretary between 1993-98. 1. The Matrix – Scale of Ranking

The Matrix for measuring the functioning of the MLAs has been designed by Praja with inputs from reputed people with sectoral knowledge in governance, political science, market research, media.

In order to design the research and get the desired output, it was important to answer the following two questions:

a. On what parameters should the performance of MLAs be evaluated?

b. How should the research be designed in order to represent areas of each MLA and meet the right people?

For the first question; The Indian Democracy functions on rules and strictures laid down in The Constitution of India adopted on the 26th November, 1949. The constitution has been amended on numerous occasions and various acts have been passed and adopted by subsequent assemblies to strengthen the functioning of centre, state and local self government institutions. All these acts/legislations with their base in the constitution give our elected representative needed powers for functioning; have built the needed checks and balances; and serve as the source of the terms of reference for the elected representatives on all aspects of their conduct as the people’s representatives. Hence the first parameter for evaluating the performance of MLAs is based solely in the mechanisms and instruments and duties and responsibilities as led in The Constitution of India.

However; The Constitution itself derives its power from the free will of its citizens as also the document itself states that it has been adopted, enacted and given to themselves by the people. Hence the perceptions of the people who are represented by the elected representatives are the other important, necessary parameter for evaluating the performance of the elected representatives (the MLAs). Thus, to answer the second question it is necessary to study people’s perceptions of the MLAs performance, by who represent them from their respective constituencies.

The next few pages will elaborate the study design and details of the study conducted to judge the performance of MLAs in Mumbai; but before we get into details, it is important to understand the sources of data and its broad usage in the ranking matrix.

The following information was required to judge the performance of each MLA in the city:

1. Some of the tangible parameters like an elected MLAs attendance in the assembly, the number of questions (issues) she/he has raised in the house, importance of those questions, and utilisation of funds allotted to him/her.

2. Some parameters on her/his background such as educational qualification, income tax records & criminal record (if any).

3. Some soft parameters like the perception/impression of the people in her/his constituency, awareness about them, satisfaction with their work and improvement in the quality of life because of the MLA.

Once the areas of evaluation were finalised, it was important to decide upon the methodology which would best provide the required information. Information mentioned in points 1 & 2 above was gathered from RTI & by means of secondary research. MLA Scores have been derived out of maximum 100 marks with 60% weightage given to tangible facts about the MLA. For the information on the 3rd point a primary survey was conducted amongst the citizens in each constituency to evaluate the perceived performance of the MLA. 40% weightage was given to perceived performance of MLAs in the minds of common man.

The data used for points 1 and 2 has been collected from government sources:

a. Election Commission of India’s Website.

b. Under Right to Information Act from Vidhan Bhavan.

c. Under Right to Information Act from City and Suburban Collector Offices.

d. Under Right to Information Act from Mumbai Police.

People’s perception as per point 3 has been mapped through an opinion poll of 22,053 people across the city of Mumbai by Hansa Market Research conducted through a structured questionnaire.

It is very important to understand here that the matrix is objectively designed and provides no importance to the political party of the representative or to any personal/political ideology.

Criminalisation of politics in the country has been growing since independence and is a phenomenon which if not checked now can destroy the democratic foundations of our nation. Hence personal criminal record related parameters pertaining to the elected representative are taken into consideration such as: their FIR cases registered against them as stated in the election affidavit; new FIR cases registered against them after being elected in the current term; and important pending charge sheets.

</tr>
</tbody>
</table>

(*) This negative parameter on proactive disclosures has not been applied for the current year. But as one the primary purpose of the Report Card is to promote transparency amongst elected representatives, it is imperative that they proactively provide personal information on their personal annual economic status and to emphasise their probity in public life, they should share every year their updated criminal record.

### 2. Parameters for Past Records as per Affidavit

Parameters for Past Records are based on information in election affidavit that includes educational, criminal and financial records of MLAs. Total eight Marks out of Maximum 100 marks are allocated for this parameter.

**a. Education**

If the elected representative has declared in his affidavit, education qualification as 10th pass or more than that then on the scale one mark is allocated, else zero marks are given.

As a developing 21st century country, basic modern education is an important criterion for human development. Even at lowest clerical jobs in the government, the government insists on a minimum educational level. Going by the same logic and the times, it is prudent that a similar yardstick be applied to our elected representatives. However, we also believe that the educational parameter should be given a minimal weightage in the overall scheme vis-a-vis other parameters, that are more crucial for judging performance of the elected representatives.

**b. Income Tax**

It is widely published and believed in India that annual income levels and wealth of those who are elected sees a manifold increase in the few years
when they represent. On this parameter, marks are allocated only for declaring returns (one mark) and for possessing a PAN card (one mark), as per the affidavit.

c. Criminal Record

Criminalisation of politics is a sad reality. A significant number of elected representatives have a criminal record i.e. 1) they have FIRs registered against them; 2) charge sheets filled; and 3) even convictions given by the courts of law.

There is no excuse for not having moral probity in public life. It is the right of the citizens to have people representing them with no criminal records. Hence the scheme of ranking has into account marks for people with clean records:

i. Those with absolutely no criminal FIRs registered are given five marks.
ii. Those with FIRs registered against, with cases containing the following charges: murder, rape, molestation and extortion are given zero marks.
iii. Those with other FIRs registered against, other than those mentioned in No. ii above, are given three marks.

We have negative markings as explained in No. 5 below for other parameters related to crime records like charge sheet.

Kindly note that allocating scoring for each individual case would have been complex, instead scoring for cases after them being categorised as above seemed more logical and hence number of individual cases are not of that important but the category of case needed for the scoring.

3. Parameters for Present Performance in the State Legislature

In an indirect, representative democracy like India’s, citizens elect their representatives so that these representatives can represent them in the houses of legislation and deliberate on issues related to the citizens and form needed legislations under the guidelines of and using the mechanisms of the constitution. Thus it is very clear that the weightages in the performance scale have to be more biased to these functions of the elected representatives i.e. of Deliberation.

a. Session Attendance

The mandate given by citizens to the representatives is to attend the business of the respective legislative houses. It is hence prudent that the representatives attend 100% or near to 100% sessions of their respective houses. Hence the marking as follows based on percentage of attendance: (1) 100% to 91% - 10 marks; (2) 90% to 76% - eight marks; (3) 75% to 61% - six marks; (4) 60% to 51% - four marks; and (5) below 50% - zero marks.

b. Number of Questions Asked

There cannot be really a set benchmark for the right number of questions or issues that have to be asked by a representative. However given the range and complexity of issues that our country is facing, it is necessary for the representative to raise as many issues as they can, which are necessary for the citizens. Hence to stimulate the representatives to ask maximum number of questions the scale uses the percentile system for scoring.

<table>
<thead>
<tr>
<th>Devices used for asking ‘Questions’ that have been considered in the marking:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Starred Question</td>
</tr>
<tr>
<td>• Calling attention to matters of urgent public importance</td>
</tr>
<tr>
<td>• Half an hour discussion</td>
</tr>
<tr>
<td>• Non-Offical bills (Private Members Bills)</td>
</tr>
<tr>
<td>• Motion of adjournment for purpose of debates</td>
</tr>
<tr>
<td>• Resolution/Non-Offical resolution</td>
</tr>
<tr>
<td>• Short Notice Questions</td>
</tr>
</tbody>
</table>

The marking for this section is out of a maximum 16 marks that the representative can get for being the person with the maximum number of questions asked. The marking here is done against Group Percentage Rank: 16 being the top most percentile and so on to the lowest for 1.

c. Importance of Questions Asked (Quality of Questions)

It is not just the number of questions that are asked but also the quality of questions that are asked. The system for weightages here is designed as below:

**Step 1:**

Issues are given certain weightages depending on them being prime functions of the State Legislature or of the Municipal bodies or the Centre. As explained ahead in weightages to issues raised in the questions.

<table>

**Step 2:**

Questions asked are categorised into:

- City and Constituency based [Local Self Government (LSG)]
- State based
- Centre based

This centre-state categorisation is based on the Seventh Schedule of the Constitution of India, while the city categorisation is based on the subjects taken by local self government institutions. Overall weightage is given respective in the ratio of 5:15:1 in the above categories.

Thus after applying weightage for a question raised under Step 1 for a particular issue (for e.g. 5 for Municipal Education), weightage under Step 2 (for e.g. 5 for LSG) is applied based on whether the issue is under the domain of state, local self government or centre.

Formula representation of the calculation done to determine importance of the question asked

\[
(I_1 \times Q_1) + (I_2 \times Q_2) + \ldots + (I_n \times Q_n) = T_1; \\
(I_2 \times Q_2) + (I_2 \times Q_2) + \ldots + (I_n \times Q_n) = T_2; \\
(I_3 \times Q_3) + (I_3 \times Q_3) + \ldots + (I_n \times Q_n) = T_3; \\
T_1 + T_2 + T_3 = T_x; \\
(T_1 \times C_1) + (T_2 \times C_2) + (T_3 \times C_3) = T_Cy \\
T_Cx / T_y = M
\]

**Illustration for marking Importance of Questions Asked**

If a MLA has asked a total of 3 questions: 1 related to civic under city/constituency category, 1 question related to crime under state category, and 1 related to financial institutions under nation category; then the marking will be as below:

<table>
<thead>
<tr>
<th>Classification</th>
<th>City (5)</th>
<th>State (15)</th>
<th>Nation (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Civic (5)</td>
<td>5*1=5</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Crime (8)</td>
<td>8*1=8</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fin. Ins. (3)</td>
<td>3*1=3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Total</td>
<td>5</td>
<td>8</td>
<td>3</td>
</tr>
<tr>
<td>Total * Category Weightage</td>
<td>5*5=25</td>
<td>8*15=120</td>
<td>3*1=3</td>
</tr>
<tr>
<td></td>
<td>25+120+3=148</td>
<td></td>
<td></td>
</tr>
<tr>
<td>148/16 = 9 out of maximum 21. So the MLA gets nine marks.</td>
<td></td>

</tbody>
</table>

**d. Total Local Area Development Funds Utilised during December 2009 to March 2013**

MLAs get a Local Area Development Fund during their tenure. This fund they can spend as per their discretion on certain specified development work in their constituencies. It is necessary that the funds are utilised in a planned phased manner to achieve optimal results. And this can only happen if the representative has a appropriate plan right from the start of their term and that they do not spend the fund in an adhoc manner and that not entirely towards the end of their terms without focus on the needs of their constituency.

Hence the calculation for the current financial year is done for the sanctioned fund of Rs. 5.75 crore approved till March 2013. (1) 100% (or more) to 91%- 5; (2) 90% to 76% - 4; (3) 75% to 61% - 3; (4) 60% to 51% - 2; and (5) below 50% - 0.

4. **Parameters for People’s Perception as per Opinion Poll**

Since perceived performance was given a weightage of 40 points, we divided it further in to 4 broad areas in order to evaluate the performance in detail. All these four areas were given differential weightage based to the importance in defining the MLAs performance. The weightages were divided in the following scheme:

- Perception of Public Services (impression of the people about the facilities in the area) was given a weightage of **20 points**,
- Awareness & Accessibility of the MLA was given a weightage of **6 points**,
- Corruption index was given a weightage of **10 points** and
- Broad overall measures were given a weightage of **4 points**
The rationale for giving the above scoring points was to give more importance to the key issues like facilities in the area & corruption as compared to MLA being aware and accessible or overall feel of the people being positive. This is because we believe that scoring positively overall or being popular is actually a function of your work in different areas. Hence, these areas should be given more importance than the overall satisfaction. Moreover a blanket overall performance for an individual may be good but when interrogated deeply about different traits the positives and negatives can be clearly pointed.

The next step after assigning weightages to four broad areas was to make sure that facilities which come under the state jurisdiction get more importance than the ones which come under the central government’s jurisdiction or the local self government’s jurisdiction. Hence the weightage for Perception of Public Services was further divided into a hierarchy of 4 levels to meet the desired objective. Level 1 included facilities which are more critical to state government whereas Level 4 included facilities that are more critical to central government or the local self government.

- **Level 1** – This level included areas like Power supply, Law & Order situation & Instances of crime. It was given a weightage of **8 points**.
- **Level 2** – This level included areas like Availability of food through ration shops & Pollution problems. It was given a weightage of **5 points**.
- **Level 3** – This level included areas like Hospitals & other Medical facilities & Appropriate Schools & Colleges. It was given a weightage of **4 points**.
- **Level 4** – This level included rest of the areas like Condition of Roads, Traffic Jams & Congestion, Availability of public gardens, Availability of public transport facilities, Water Supply, Water logging problems & Cleanliness & Sanitation facilities. It was given a weightage of **3 points**.

Research Design:

- A Member of Legislative Assembly, or MLA, is a representative elected by the voters of an electoral district to the Legislature of a State in the Indian system of Government. An electoral district (also known as a constituency) is a distinct territorial subdivision for holding a separate election for a seat in a legislative body.

- Winner of this seat in the constituency is termed as an MLA and has the power to manage the functioning of the constituency.

- In Mumbai, each constituency has further been divided into administrative wards and a municipal Councillor is elected to oversee the functioning of each ward. Hence, there is a clear delegation of responsibilities at the ground level.

Since, our study focused on evaluating the performance of MLAs it was necessary to cover and represent all the assembly constituencies to which each of these MLAs belonged.

- Hence, we decided to cover a sample from each constituency. However, it is also known that constituencies differ in size as calculated in terms of area coverage and population. The number of the wards within each assembly constituency also differs.

- The total sample for the study covered for 32 MLA Assembly constituency = 22,053 respondents.

- Next step was to define the target group for the study. We finalised on covering within each ward:
  - Both Males & Females
  - 18 years and above (eligible to vote)

- Once the target group was defined, quotas for representing gender and age groups were set.

- The quotas were set on the basis of age and gender split available through Indian Readership Study, a large scale baseline study conducted nationally by Media Research Users Council (MRUC) & Hansa Research group for Mumbai Region.

- The required information was collected through face to face household interviews with the help of structured questionnaire.

- In order to meet the respondent, following sampling process was followed:
  - 2 – 3 prominent areas in the ward were identified and the sample was divided amongst them.
  - Respondents were intercepted in households in these areas and the required information was obtained from them.

- Sample composition of age & gender was corrected to match the universe profile using the baseline data from IRS. (Refer to Weighting paragraph on page 65)

- The final sample spread achieved for each assembly constituency is as follows:
Parameters of Evaluation:
While deciding the parameters of evaluation for a MLA, we wanted to make sure that we covered issues at both the state & central level and hence decided to capture the information on four important aspects. These were as follows:

- Impression of the people about different facilities in his/her area
  - Condition of Roads
  - Traffic jams & Congestion of roads
  - Availability of public gardens/open playgrounds
  - Availability of public transport facilities like Auto, Taxis & Buses
  - Availability of food through ration shops
  - Hospitals and other medical facilities
  - Appropriate schools and colleges
  - Power Supply
  - Water Supply
  - Water Logging during rainy season
  - Pollution problems
  - Instances of Crime
  - Law & Order situation
  - Cleanliness & Sanitation facilities
- Awareness & Accessibility of the MLA
- Perception of corruption for MLA
- Broad overall measures like overall satisfaction with MLA & improvement in quality of life because of MLA.

</table>

Weighted Final Scores

Perceived performance score of the MLA = 
\[
\frac{(6 \times 74) + (4 \times 64) + (10 \times 72) + (8 \times 61) + (5 \times 58) + (4 \times 68) + (3 \times 59)}{100} = 26.5\text{ out of } 40
\]

This score was further added with the performance on hard parameters and a composite score for each MLA was derived.

Weighting the data:

When conducting a survey, it is common to compare the figures obtained in a sample with universe or population values. These values may come from the same survey from a different time period or from other sources.

In this case, we compared the age & gender compositions achieved in our survey with the similar compositions in IRS study (Indian Readership Survey).

In the process, minor deviations for demographics were corrected.

Hence, weighting not only helped us to remove the demographic skews from our sample data but also ensured that the representation of demography was correct.

5. Parameters for Negative Marking

Negative marking for new FIR cases registered

If there has been a new FIR registered against the elected representative after his election then this happens to be a matter of concern; and hence out of the marks earned by the representative, five marks would be deducted.

Do note that in the process of allocating marks does not take into account number of new criminal FIR cases, but simply takes into account even a single occurrence for allocating marks based on the severity of the crime.

Negative marking for Charge Sheet registered

A charge sheet signifies prima facie evidence in the case. This is again a serious concern for moral probity of the representative. Hence out of the marks earned by the representative, five marks would be deducted.

Do note that in the process of allocating marks does not take into account number of criminal charge sheets, but simply takes into account even a single occurrence for allocating marks based on the severity of the crime.

Negative marking for no annual pro-active disclosures by the elected representatives of Assets and Liabilities and Criminal record

As per the election commission norms the candidate standing for elections have to file an affidavit detailing amongst other things, their own asset and liabilities and criminal records. The candidate who gets elected later, does not share this information with his constituency or the election commission until and unless he/she stands for re-election or for a new election on different seat or post. However given the need of the time, we feel that it is necessary that the elected representatives proactively make their assets and liabilities (income status) and criminal records available to their constituencies at the end of every financial year when they are representing. This can be done through Newspapers or other Public Medias or through their own Websites or through Praja Website. This will bring larger transparency.
The four lions of the Ashoka Pillar, symbolizing power, courage, pride and confidence are the ethos behind the Indian Republic as embedded in our Constitution. We salute the top 3 ranking MLAs of Mumbai as torch bearers of this idea. They have topped the list by on an objective ranking system as explained earlier in this report card, performing more efficiently relative to their peers. Jai Hind.

**Trophy 1** – The Best Elected Representative as per Praja Matrix of Ranking Performance of MLAs.

**Trophy 2** – The Second Best Elected Representative as per Praja Matrix of Ranking Performance of MLAs.

**Trophy 3** – The Third Best Elected Representative as per Praja Matrix of Ranking Performance of MLAs.
THE CONSTITUTION OF INDIA

WE, THE PEOPLE OF INDIA,
HAVING SOLEMNLY RESOLVED TO
CONSTITUTE INDIA INTO A
SOVEREIGN SOCIALIST SECULAR
DEMOCRATIC REPUBLIC AND
TO SECURE TO ALL ITS CITIZENS:
JUSTICE, SOCIAL, ECONOMIC AND
POLITICAL;
LIBERTY OF THOUGHT, EXPRESSION,
BELIEF, FAITH AND WORSHIP;
EQUALITY OF STATUS AND OF
OPPORTUNITY; AND TO PROMOTE
AMONG THEM ALL
FRATERNITY ASSURING THE DIGNITY
OF THE INDIVIDUAL AND THE UNITY
AND INTEGRITY OF THE NATION.
