✔ Even breathing in Mumbai is dangerous leader

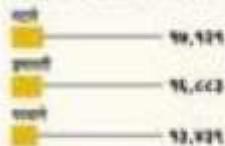

TRENDS | Pollution | Trend | 4 dec 2022 | REPORT

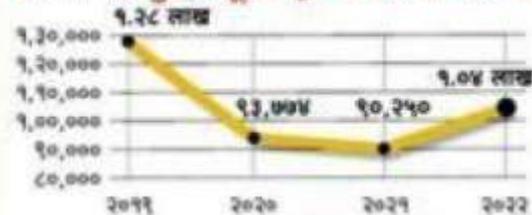

मुंबईकरांच्या दशकातील सर्वाधिक तक्रारी कशाबद्दल ?

२०२२ मधील तक्रारी

कोरोनानंतर मुंबईत दूषित हवेच्या तक्रारी वाढल्या

Mumbai,Leading News Service: A report released by the Praja Foundation on Tuesday virtually undressed the Mumbai Municipal Corporation's waste management and showed the sheer number of complaints that Mumbai's air has become unbreathable day by day. Especially after the corona epidemic, even though the complaints of polluted air have increased in Mumbai, the municipality does not seem to be taking any concrete measures to keep the air clean.

124% of complaints increased only about waste. Solid waste management in Mumbai seems to have completely collapsed. Because, the garbage is not picked up, it is lying like that, it gives off bad smell, such complaints have increased by 124 percent in the last ten years. In 2013, 5 thousand 519 and in 2022, the same complaints reached 12351.

237% increase in air pollution complaints. Even in four years from 2019 to 2022, this growth is 30 percent. Find out why Mumbai's air deteriorates. In particular, the Municipal Corporation does not understand even by saying that the ward should be considered as the factor. The air deteriorates and Mumbaikars continue to breathe the same air.
